Brand New Book ***** Print on Demand *****.Excerpt from Bulletin of the Society of Arts: March 1909 Precious metal mines are mostly selected for the salters art. but cases have been known where attempts have been made to salt an iron mine, which ought, however, to be a very difficult thing to do successfully upon a competent engineer. Thousands of dollars worth of genuine diamonds have been thrown carelessly over large areas to give the appearance of rich diamond fields, and thousands of dollars worth of valuable ore has been placed in the ore piles to be examined. and expert engineers have been deceived. Generally a mine, if a large one, cannot be salted all over; hence, the advantage of taking a large number of small samples from as many different parts of the mine as possible, rather than a small number of large samples. The cheaper method is to salt the engineers samples, and besides a better control can be obtained as to the strength of salting; thus less suspicious values are likely to be obtained on assay. In cases where engineers have...
