

A Monograph of the Gault: Being the Substance of a Lecture

By F G Hilton Price

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.From the INTRODUCTION. The Gault is a deposit of blue, grey, and sometimes of reddish clays and marls, which are met with in the middle of the Cretaceous strata above the topmost beds of the Upper Neocomian formation viz. the zone of Ammonites mamillaris, and is by the majority of French geologists looked upon as Gault; but English geologists differ as to this division, the reason for which will be given further on in this work. The lower beds of the Gault in Kent, Sussex, Surrey, Cambridge, c. consist of stiff blue clay; the Upper Gault is greyer and more marly. In Norfolk and parts of Yorkshire, the representative of the Gault consists of red marly clays, and in parts of East Sussex it sometimes consists of brown, red, and yellowish clays passing into black shales. In many parts of France it partakes of a yellow and greenish sandy nature. In some places its soil is known agriculturally as the black land. The term Gault appears to have been used in Cambridgeshire and Lincolnshire alike for all dark-coloured...

Totally one of the better pdf I have at any time read through. It really is simplified but shocks within the 50 % from the ebook. Once you begin to read the book, it is extremely difficult to leave it before concluding.
