Introduction to Astronomy and Cosmology

By Morison, Ian

Wiley, 2008. Book Condition: New. Brand New, Unread Copy in Perfect Condition. A+ Customer Service! Summary: Preface.Bibliography.Chapter 1: Astronomy, an Observational Science.1.1 Introduction.1.2 Galileo Galilei's proof of the Copernican theory of the solar system.1.3 The celestial sphere and stellar magnitudes.1.4 The celestial coordinate system.1.5 Precession.1.6 Time.1.7 A second major observational triumph: the laws of planetary motion.1.8 Measuring the astronomical unit.1.9 Isaac Newton and his Universal law of Gravity.1.10 Experimental measurements of G, the Universal constant of gravitation.1.11 Gravity today: Einstein's special and general theories of relativity.1.12 Conclusion.1.13 Questions.Chapter 2: Our Solar System 1 - The Sun.2.1 The formation of the solar system.2.2 The Sun.2.3 Nuclear fusion.2.4 The solar neutrino problem.2.5 The solar atmosphere: photosphere, chromosphere and corona.2.6 The solar wind.2.7 The sun's magnetic field and the sunspot cycle.2.8 Prominences, flares and the interaction of the solar wind with the earth's atmosphere.2.9 Solar eclipses.2.10 Questions.Chapter 3: Our Solar System 2 - The Planets.3.1 What is a planet?3.2 Planetary orbits.3.3 Planetary properties.3.4 Planetary atmospheres.3.5 The planets of the solar systems.3.6 Comets.3.7 Questions.Chapter 4: Extra-solar Planets.4.1 The radial velocity (Doppler wobble) method of planetary detection.4.2 Planetary transits.4.3 Gravitational microlensing.4.4 Astrometry.4.5 Discovery space.4.6 Selection effects and the likelihood of finding solar systems like ours.4.7...

Reviews

The ebook is straightforward in go through preferable to recognize. It typically does not charge too much. Its been designed in an exceptionally straightforward way and it is just following i finished reading this book where basically altered me, affect the way i really believe.
