

Nanoporous Materials: Advanced Techniques for Characterization, Modeling, and Processing (Hardback)

By -

Taylor Francis Inc, United States, 2011. Hardback. Book Condition: New. 236 x 164 mm. Language: English . Brand New Book. Having successfully replaced elements used in traditional, pollution-prone, energy-consuming separation processes, nanoporous materials play an important role in chemical processing. Although their unique structural or surface physicochemical properties can, to an extent, be tailored to meet specific process-related requirements, the task of characterizing them completely is still a difficult and frequently controversial problem. Nanoporous Materials: Advanced Techniques for Characterization, Modeling, and Processing outlines existing and expected innovations in the combination of characterization and modeling techniques used to distinguish, monitor, and control the evolution of properties in nanoporous sorbents, catalysts, and membranes during their synthesis and utilization in several important energy processes. Providing broad coverage of the subject to make it useful for academic and industrial researchers from different disciplines and backgrounds, this book: * Presents the basic principles and major applications of key characterization techniques-from diffraction and spectroscopy to calorimetry and permeability * Explores computer simulation techniques, an indispensable complement to the combination of the aforementioned analytical techniques * Covers the fundamentals and the recent advances in sorption, membrane, and catalyst processes * Describes two characteristic case studies on emerging...

Reviews

This pdf is so gripping and exciting. It can be full of knowledge and wisdom I am just effortlessly could get a enjoyment of reading a published pdf.

-- **Henri Gutkowski**

This ebook is definitely not straightforward to begin on studying but quite fun to read. It is one of the most awesome book i actually have go through. Once you begin to read the book, it is extremely difficult to leave it before concluding.
