Reviews

This type of publication is every thing and helped me seeking ahead and much more. It usually fails to charge too much. It is extremely difficult to leave it before concluding, once you begin to read the book.

Not illustrated. 1861 Excerpt: . . . down very rapidly water discoloured by peat and earth, and unfit for domestic use; but in fine weather the quantity is much reduced, and the water clear and suitable for the mains of the town. Fig. 45 represents a transverse section of the watercourse which is carried through the masonry of the weir, conveying clearwater from other streams, across the valley in which the weir is placed, and so serving as an aqueduct; at the top this is open, as at m n, and when the water flows over at a small depth, that is, when it is clear, it falls into the channel, Fig. 45a, and is conveyed by it eventually into the main which supplies the town; but if it rise and discharge a greater body of water, the increased velocity projects it beyond the edge of the opening, Fig. 45b, and it thus passes over the longitudinal opening, and flows down to the compensation reservoir for the supply of water to the mills situated on the river. By referring to 8, we find the means of calculating the curve of any issuing jet of water. But in this case we have a different velocity, and therefore a different parabola for every lamina into which we may suppose the water divided. Fig. 46a represents the different paths taken by each, that for the mean velocity at the top of the depth being drawn in a full line; hence those above will tend to depress the...
