The cost of corrugated iron housing is the same as quoted for steam cranes at page 21. At a slightly increased cost a steam capstan can be fitted for dragging stones in quarries, moving trucks, c., or the construction may be modified to admit of one or more Goliaths being driven by a line of shafting in a similar manner to that employed for driving the Overhead Power Travellers, described at page 69. This arrangement has been adopted on works for constructing the heavy concrete or beton blocks now so generally used for breakwaters and harbour work, the power being taken from the engine used for working the concrete mixers and block-making machinery; and the cost is from 10 to 15 per cent, lower than for Goliaths having their own engine and boiler. STEAM CRANE ON GOLIATH. Another modification is to have a steam crane fixed at one end of the framing, as shown in Fig. 160, or a steam portable crane to move from end to end on rails on the main beams. This subject has been discussed in many of the scientific journals both in this and other countries, with special reference to the various works executed by the Authors, and the following remarks are taken from a verv interesting Paper on The North Eastern Railway Company s Dock Extension Works at Middlesbrough, read before the Cleveland Institution of Engineers in April, 1874, by Mr. A H. Whipham, who had charge of...
