Report Volume 3, PT. 2

By Pennsylvania Dept of Agriculture

Not Avail, United States, 2012. Paperback. Book Condition: New. 246 x 189 mm. Language: English . Brand New Book ***** Print on Demand *****.This historic book may have numerous typos and missing text. Purchasers can download a free scanned copy of the original book (without typos) from the publisher. Not indexed. Not illustrated. 1898 Excerpt: .in the following statement: It seems, therefore, that the data go far to prove that evaporation is effected principally by temperature, and to an entirely subordinate extent by the character of the vegetation or the topography of the water shed. The force of this is apparent when we bear in mind that rainfall, less evaporation, as we have considered it, gives the amount of water which will flow off in the streams. Mr. George S. Rafter, C. E., in a valuable article on stream flow in relation to forests takes exception to the theory advanced by Mr. Vermeule, on the ground that the New Jersey data, on which he chiefly bases his statement, are too restricted in their scope to give any conclusion on the point in question, and also calls attention to some errors in refutation of Mr. Vermeule's theory by instancing the run-off...

Reviews

The ideal ebook i possibly study. Better then never, though i am quite late in start reading this one. It is extremely difficult to leave it before concluding, once you begin to read the book.
